

Speed is mission-critical in modern investigations. BriefCam is a world-class AI platform used globally to identify critical video evidence quickly and efficiently. The Data Central Evidence Engine (DCEE) significantly accelerates BriefCam workflows by processing more than 2,000 proprietary video formats into standardized MP4 files—up to 10x faster than traditional transcoding—directly on your workstation.

Once converted, investigators simply click “Send To” to load videos into BriefCam. After BriefCam completes its AI-driven synopsis, results are automatically returned to DCEE evidence list and organized alongside:

- The original first-instance evidence
- The MP4 work product
- The BriefCam synopsis file

When needed, DCEE’s built-in video editor creates precise sub-clips of critical footage for rapid cloud disclosure. DCEE also integrates with leading Digital Evidence Management Systems (DEMS), including Evidence.com and Prosecutor Premier by Axon Enterprise, Inc.

To explore the Pilot Program, use this link to register [Free 14 Day DCEE Pilot](#). The following link is a short video on the product and workflow [Proprietary Video Processing Featuring BriefCam AI](#). Other videos of DCEE benefits are: [Instant Evidence Ingest and Processing](#) and [Free Multi-Format Evidence Viewer - Case-Paks](#)

Why BriefCam + DCEE

If you use BriefCam—or are evaluating advanced AI video analytics—DCEE dramatically reduces manual review time and accelerates case progression amid the growing volume of digital evidence faced by law enforcement, prosecutors, and security teams.

A **free 14-day DCEE pilot** is available for BriefCam users, including **1TB of processing at no cost**. To explore the Pilot Program, use this link to register [Free 14 Day DCEE Pilot](#) and a representative will schedule your installation.

If you continue after the pilot, DCEE operates on a flexible Data Plan model:

- No annual software licensing fees
- Purchased data does not expire
- The Data Plan is simply consumption usage as needed
- The low-cost Data Plan meets OPEX structure (not CAPEX)

Core Benefits of DCEE

Instant Evidence Ingest

No file copying. No delays.

Drag and drop video, audio, documents, drone footage, and mobile device extractions.

- View evidence in seconds
 - Preserve chain of custody
 - Authenticate transfers with court-approved hash algorithms
 - Eliminate Windows file-copy bottlenecks
-

Proprietary Video to MP4 — 10x Faster

Automatic binary-level rewrapping of proprietary video formats.

- Supports 2,000+ proprietary formats
 - Binary-level rewrapping (not slow transcoding)
 - Move from ingest to action in minutes—not hours or days
-

AI-Ready Evidence Instantly

Standardized media and metadata prepared for analytics.

- Standard MP4 output
- Seamless integration with BriefCam and other AI platforms
- Faster analytics, synopsis generation, and case advancement
